

### **Will Freeance Mobile work on my BlackBerry smartphones?**

Freeance Mobile has been developed to work on almost every BlackBerry smartphone. So let's just cover the BlackBerry smartphones that will not run Freeance Mobile, and some other ones that have special considerations.

### **What BlackBerry smartphones will not run Freeance Mobile?**

The BlackBerry model 7100, model 7250, model 7520, any BlackBerry with the operating system older than 4.2. This covers just about all BlackBerrys that were made before 2007. To find your BlackBerry OS, click on the "options" button, then click on the "about" button. Towards the top of the list find the line starting with "v" and your OS number. To learn how to upgrade your BlackBerry OS go to the Internet BlackBerry support site. If you have the BlackBerry 8700 with and an OS older than 4.2 you can upgrade the OS so it will work with Freeance Mobile.

### **Phones with special considerations.**

Some older Verizon BlackBerry phones have the GPS blocked for third-party applications. Therefore Freeance Mobile cannot zoom to your GPS location with these Verizon BlackBerry smartphones. You can still use Freeance Mobile, you just cannot zoom to your GPS location, unless you have an external Bluetooth GPS puck. Newer Verizon phones such as the Storm, Tour and Storm2 do not have GPS blocked.

### **Nextel 8350i Push to Talk BlackBerry**

the Nextel 8350 I runs on the iDEN network, which is a special data network. This causes the 8350i to take longer to bring up maps with Freeance Mobile. The software does work with this model, you just have to be patient. Maps take about 20 seconds to load verses 4-8 seconds on other BlackBerrys.

### **Are there any additional charges for using Freeance Mobile?**

There are no additional charges when using Freeance Mobile. However, if you are on a data plan that does not allow for unlimited data transfer you will be charged for data transfer by your carrier the same as any other mobile mapping application or Web browsing.

### **Which countries can I use Freeance Mobile in?**

Currently Freeance Mobile is available only in the US and Canada. There are plans in the second half of 2010 to make Freeance Mobile available in other countries.
